

## ABSTRACT OF DISCLOSURE

### SYSTEM AND METHOD OF PERSONAL AND BUSINESS WEB CARDS

- 5 A system of personal and business web cards comprises at least a server having at least a search engine, at least a database, and a plurality of electronic apparatus being accessible to the Internet and thus connectable with said server through the Internet. The database contains at least personal data and information of individuals who are located within at least one particular geographic area or sign on with an Internet Service Provider
- 10 (ISP). The database may contain a plurality of sub-databases for a variety of categories of individuals or businesses. Anyone who has an access to the aforesaid server may search any such personal or business information from these databases.
